

Polish industrial design promotion in Spain

2008-09-12

Between September 15 -25th in Madrid modern industrial design and functional art designed by Polish artists are to be presented on an exhibition "Designed in Poland". The exhibition will take place in the Trade and Investment Promotion Section of the Embassy of the Republic of Poland, Av. Doctor Arce 25, Madrid.

The exhibition intends to draw attention to the characteristic features of the Polish functional art and to encourage Spanish customers to reach for Polish goods. Among the exhibits were elements designed for interior decoration, jewellery, porcelain, artistic and functional glass creations, fixture, carpets, toys, bikes, everyday articles and many more. High quality and extraordinary patterns combining traditional and modern designs constituted the most characteristic feature of all the exhibits. Visitors will be presented with an informative catalogue containing photos and information about presented products.

The exhibition is to be opened on September 15th. During the opening of the exhibition a fashion show presenting Natasza Pavluschenko's collection "The Gitter of Evening" will take place as well as a presentation of amber jewellery designed by Mariusz Gliwiński and made by AMBERMODA company.

The event was prepared by the Polish Information and Foreign Investment Agency and forms part of the economic programme realised in the frame of Polish participation in the Saragossa EXPO 2008.

We invite you to visit the exhibition and hope that the selected works of Polish artists will be a source of a unique and unforgettable experience for you. (PAIiZ)
